

WHY THIS IS READY NOW

- 1

ZEUS DOC is live — Tokenless, passwordless identity + signing at apiaegissecurity.tech/zeusdoc — threshold 2-of-3, E2E verified
- 2

AEGIS guards it — 8 modules · 37 endpoints · AI prompt-injection defense (DAN blocked 0.8) · watermarking · self-protection
- 3

NHS compliance built in — DTAC · DSPT · UK GDPR · DPIA · NHS T&Cs IP clauses — drafted, ready
- 4

Proven reference — Estonia: 99% e-ID, 100% services online, e-Health 100% of patients, signatures save 2% GDP annually

THE ESTONIA PROOF — OUR BLUEPRINT

- 99%

citizens hold an e-ID
- 100%

state services online (2024)
- 100%

patients on national e-Health record
- 2% GDP

saved annually by digital signatures
- 53%

of divorces filed online since launch

WHY ZEUS — AND WHY SOVEREIGN

- UK sovereignty** — JDB Sales IP licensed to ZEUSTA — the Crown keeps security of supply, employment and tax in the UK
- AI threat layer** — No foreign reference product offers AI defense over identity; AEGIS does
- Consent audit** — Every event = HMAC-verified, idempotent receipt — citizens can see who accessed what, when
- 50M scale** — Certified-bureau cards + ZEUS DOC + registries uplift — built for NHS England, not a 1.3M pilot

COMMERCIAL TIERS (£24.4B value · 28.2x ROI · 10yr)

- Pilot — one ICB/trust, ZEUS DOC + AEGIS + 100k cards

£1.0M / yr
- Regional — ICS cluster + consent ledger + data adapter

£8M / yr
- National 50M — full rollout

£86M / yr (10yr £865M)
- White-label — licence / export

Bespoke
